

Windows Task Manager - Opening

Article Number: 162 | Rating: Unrated | Last Updated: Mon, Jul 3, 2017 at 5:54 PM

Windows *Task Manager* is an invaluable tool for checking what might be slowing down the computer and forcing problem applications to close.

There are several ways to open *Task Manager*:

1. Press *Ctrl+Shift+Esc*;
2. Right-click the taskbar and select from the menu;
3. Right-click the Windows button and select from the menu.
